-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 01 October 2004.
2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/1/04 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, line 5 and Claim 2, line 5; "addition value" is not understood. Does it means -- additional value--?

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Anbe (U.S. Patent 4,506,532) in view of Martinetz et al. (U.S. Patent 5,740,686).

Anbe teaches a method for rolling metal strip in a rolling train having at least two rolling stands, and wherein the metal strip has at least two areas of different thicknesses connected via a substantially wedge-shaped transition pieces (Figs. 1 and 2), comprising setting the rolling velocity of a rolling stand during rolling of the transition piece as a function of the rolling stand's forward slip, and with an addition value m_s as a function of the metal strip's temperature (col. 11. line 63-col.12. line 12), and also Anbe discloses an apparatus for above method comprising means for setting the rolling velocity of a rolling stand during rolling of the transition piece as a function of the rolling stand's forward slip, and with an addition value and as a function of the metal strip's temperature (col. 11. line 63-col.12. line 12).

Anbe fails to teach the additional value is calculated using at least one neural network. Martinetz et al. teach the additional value is calculated using at least one neural network (13). (col. 3, lines 30-57).

It would have been obvious to one of ordinary skill in the art at the time of the invention was made to utilize at least one neuron network to calculate a additional value as taught by Martinetz on the method of Anbe so as to get the accurate parameters.
